

June 2024

**Master Brewer Module 2
Examination Report**

Master Brewer – Module 2

For both papers 1 & 2, candidates on average utilised 100% of the total available examination time

Overall

- Cohort performance and overall pass rate will not be published due to number of candidates completing this paper this year

General Commentary

Reading and Understanding

- Candidates are reminded to read the questions carefully to ensure they are clear on what they are being asked and to enable them to answer concisely and appropriately.

Time Management

- It is also good examination practice for candidates to go back through their answers once finished, their examination before submitting it, to check they are happy with their responses.

Application of Knowledge

- Candidates should ensure that they have a thorough insight into the basic theory of beer filtration design as well as carbon footprint.
- This will support problem solving at Master Brewer level and enable candidates to provide high quality answers to questions asked.
- Questions on these topics were poorly answered.
- Candidates should not forget the importance of recipes, specifications and standard operating procedures for control of processes and sustainability when answering questions and they should use practical knowledge, good practices and importantly their own experience in their answers.
