

**June 2024**

**Master Brewer Module 4**

**Examination Report**

## **Master Brewer – Module 4**

For both papers 1 & 2, candidates on average utilised 98% of the total available examination time

### **Overall**

- Due to the small number of candidates who sat Master Brewer 4 we are not publishing specific pass rates or grades to protect individual's personal information

### **General Commentary**

#### **Reading and Understanding**

- The Environmental, Health and Safety and Quality questions were answered reasonably well

#### **Time Management**

- There were very short answers to the Resource Planning question with just one candidate producing a satisfactory answer. This may be because candidates, by this stage, were running short of time or possibly they were a little daunted by such a topical question.

#### **Application of Knowledge**

- The answers provided by candidates to Paper 2 questions on Financial Management, Supply Chain and Resource Planning were lacking suggesting that most candidates were unable to problem solve for scenarios which required confronting CEOs and Heads of Breweries.
- The content of the answers to these was lacking and demonstrated that candidates did not yet have the experience necessary to pass this level of qualification.
- It is important for candidates to be prepared to answer questions across the whole of syllabus and can articulate the application of their knowledge and experience when answering questions at this senior Master level of qualifications.
